EXPERIENCE

Smaart Healthcare

Aug. 2025 – Nov. 2025

Software And Data Intern

Chennai, India

- Reduced manual patient intake effort by 40% by building a real-time AI nurse triage assistant using Flask, MongoDB, and Vapi.ai.
- Improved patient query routing efficiency by 35% by developing NLP-based intent classification pipelines for voice and text interactions.
- Accelerated emergency response workflows by 30% through automated nurse alert escalation systems for critical patient requests.

PROJECTS

VConnect

2025

- Engineered a scalable analytics dashboard processing datasets for 650,000+ Indian villages using Python and MongoDB.
- Improved rural data retrieval efficiency by 45% by building AI-driven search and analytics workflows.
- Reduced CSV preprocessing time by 50% using optimized Pandas-based data integration pipelines.

AI Nurse Triage Voice Assistant

2025

- Reduced patient symptom collection time by 35% by designing a voice-enabled healthcare assistant using Flask and Vapi.ai.
- Improved conversational response accuracy by 30% through real-time speech processing integration workflows.
- Enhanced healthcare summary retrieval efficiency by 40% using secure MongoDB storage pipelines.

EDUCATION

Measi Institute of Information Technology

2024 – 2026

Master of Computer Applications (MCA)

Chennai, India

The New College

2021 – 2024

Bachelor of Computer Applications (BCA)

Chennai, India

SKILLS

Languages: Python, Java, SQL, JavaScript
Frameworks: Flask, Spring Boot, REST APIs
Tools: Git, GitHub

Databases: MongoDB, MySQL
Core CS: DSA, OOP, DBMS

ACHIEVEMENTS

1st Prize — Intra-College Hackathon, Measi Institute of Information Technology

2025

2nd Prize — MGR University Hackathon, Department of IT

2025

Solved **250+ DSA Problems** on LeetCode

Ongoing
